

Yamaha Stagepas PA Setup

Attach red/black Yamaha lead (found in back of speaker) to the input at the back of the speaker

Connect to another jack lead (with the jack-jack adapter attached). Attach to the left 'Speakers' input on mixer

Attach to jack adapter lead and into right 'Speaker input' on the mixer

XLR inputs - from vocals or instruments (via DI box).
Ch 4 can take a jack lead from guitar (press down 'Hi-Z' button)

Jack lead input (e.g. stereo from keys or mono - guitar etc)

'Monitor Out' for foldback

Phono input from laptop / iPad etc. to playback songs / audio

Power lead

Click down button to avoid feedback noise!

On / Off Switch

Master Volume

Press down if you need channel to be mono (1 input). Press up if using 2 inputs.

If using a 'condenser' mic or DI box, make sure 'Phantom Power' is on

Volume for individual channels. Don't make so loud the lights go into 'red' (causes distortion)

Click here for type of reverb and amount (e.g. 'plate'). Make sure the 'reverb on' button is down

Click here for amount of reverb on the individual channel (use for vocals)
